

## Second Edge

With WS facing, starting at the top RH corner, (you should be seeing the back of your cable panel and be picking up from the CO edge of your cable pattern when you get towards the center), PU and K 147 sts along the longer edge of your modified rectangle. Turn.

**Row 1 (WS):** [K3, p3] to last 3 sts, K3

**Row 2 (RS):** [P3, k3] to last 3 sts, p3.

Rep these two rows. Break yarn, leaving a 24-inch tail (you can use this to seam your sleeve.)

Now, place the first 45 sts on holder, attach new yarn, BO 57 sts using the EBO, break yarn, and place last 45 sts on second st. holder. Each set of 45 sts will be grafted to 45 from the other side of your sleeve border. If you prefer to block before grafting, make sure these sts are on a long piece of yarn or cable to allow blocking room.

If you haven't already blocked the shrug, do so now, being careful not to over-block the ribbing.

## Finishing

With RS facing, fold the sleeve over and graft the live sts at the end of one sleeve tog with the parallel live sts on that same sleeve. Do the same for your other sleeve. This will look best if done using a Kitchener St, but if you prefer you can use a three-needle BO or sew the seam using a mattress st. Keep in mind that only the Kitchener grafting will be seamless.

When you have finished seaming both sleeves, break yarn and weave in all ends, being careful to weave in at the same tension as your knitting.

## CENTER PANEL – WRITTEN INSTRUCTIONS

**NOTE:** All wrong-side (WS) rows are worked in pattern (i.e., knit the knit sts and purl the purl sts). In addition, do the following when working WS rows:
